About me

Graduated in computer science with a focus on programming.
Work experience in the welding industry and managing computer networks.
I am always ready to help and listen to my clients and colleagues. I am reliable and open to new experiences.

Experience

Web Development Intern

2024 - PRESENTE, Taipei, Taiwan

- Two-Month Experience through Rotary New Generations Service Exchange

- I followed the development of the front-end part in the company, learning about daily activities and the project structure of the CRM system.

- I studied various programming languages (HTML, CSS, JavaScript, Node, React, SQL) in person through courses recommended by the staff.

- I used intercultural communication skills to interact with various staff members who had different levels of English proficiency.

- I gained insights into Taiwanese work culture by participating in various team events and building connections with colleagues.

Freelance / Web Developer

2022 - PRESENT, Italy

- Website creation using the WordPress platform, utilizing knowledge of HTML and CSS.

- Researching and utilizing various plugins for website development, according to client requirements.

Proxi srl / IT Manager and Welding technician

2013 - 2023, Brescia

- Website management and maintenance of company computers.

- Creation of surveillance systems using cameras and specialized sensors.

- Analysis of malfunctions and repair of various types of welding machines.

- Collaboration with colleagues to find the best solution.

- Time management based on workload.

- Warehouse management responsibilities.
